

SPECIALIST SERVICES

HIGH QUALITY SERVICES
AND SUPPORT TO THE OIL
AND GAS INDUSTRY

HIGH LEVEL OF COMPETENCE

SPECIALIST SERVICES WITHIN VALVES, ACTUATION, INSTRUMENTATION

Haakon Ellingsen AS offers high quality specialist services and support within valves, actuators and instrumentation. We provide a full range of valve and actuation services to meet the most stringent and demanding applications.

Our service engineers' expertise is based on many years of experience and collaboration with renowned manufacturers of valves, actuators and instrumentation components. They have completed the manufacturer's own training programs and are authorized to perform repairs, overhauls, and general maintenance on behalf of the manufacturer. In addition, they hold all necessary offshore certificates and authorizations.

We operate in Norway as the individual manufacturer's extended arm, and perform service assignments according to the manufacturer's own procedures.

COST EFFICIENT MAINTENANCE

Our focus on cost and space-saving solutions in combination with harsh operating experience makes us the perfect partner for total service and maintenance contracts.

We provide solutions that results in reduced costs, improved valve performance, more effective maintenance, minimised commissioning time and reduced downtime.

WHAT WE OFFER

Advisory services

- Supervision
- Condition inspection
- Surface treatment inspection, Frosio level 3

Specialist services

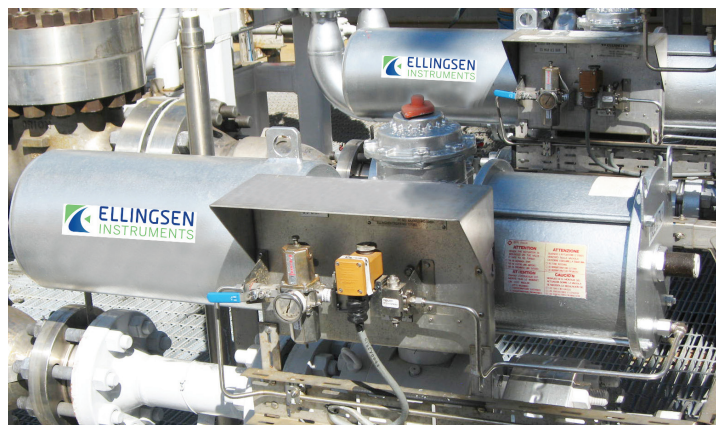

- PSV service
- Valve service
- Actuation service pneumatic/hydraulic/electric
- Instrumentation service
pneumatic/hydraulic control systems
